This STANDARD is not met as evidenced by:
Based on document review and interview, the facility failed to base the emergency plan on a risk assessment. This was evidenced by the failure to identify potential natural, man-made, and facility specific hazards based on risk assessment unique to the facility, community, and geographic location. This affected all patients and could result in the facility inadequately prepared for hazards that could be identified by a risk assessment.

Findings:

During document and interview with the Administrator on 4/30/18, the risk assessment was requested.

1. At 1:55 p.m., the facility failed to provide a risk assessment to identify potential hazards for the facility. Upon interview, Administrator confirmed the finding.
