(X4) ID Prefix Tag	**Summary Statement of Deficiencies** (Each deficiency should be preceded by full regulatory or LSC identifying information)
E0029	Development of Communication Plan CFR(s): 485.68(c) 403.748(c), 416.54(c), 418.113(c), 441.184(c), 460.84(c), 482.15(c), 483.73(c), 483.475(c), 484.102(c), 485.68(c), 485.542(c), 485.625(c), 485.727(c), 485.920(c), 486.360(c), 491.12(c), 494.62(c). (c) The [facility] must develop and maintain an emergency preparedness communication plan that complies with Federal, State and local laws and must be reviewed and updated at least every 2 years [annually for LTC facilities]. This STANDARD is not met as evidenced by: Based on review of facility documents and interview, it was determined the facility failed to update at least every two years a written emergency communications plan that contained how the facility coordinates patient care within the facility, across the healthcare providers and with state and local public health departments, and emergency management systems. Failure to develop a written emergency communications plan poses the high potential risk that all staff working in the facility will not be aware of their role expectations during any type of emergency that is encountered at the facility, which is a health and safety risk for their patients, as needed information may not be able to be transmitted or received. Findings include: Facility record review on 12/09/2020 revealed the last review of the facility's emergency communications plan that contained how the facility will coordinate patient care within the facility, across the healthcare providers and with state and local public health departments, and emergency management systems, was September 2018. A request was made for an updated plan. None was provided.

	The Executive Director confirmed on 12/09/2020, the facility failed to update their emergency communications plan that contained how the facility will coordinate patient care within the facility, across the healthcare providers and with state and local public health departments, and emergency management systems.
