(X4) ID Prefix Tag	Summary Statement of Deficiencies (Each deficiency should be preceded by full regulatory or LSC identifying information)
V0583	<p>H-TRAIN BY CERTIFIED HOME TRAIN FACILITY CFR(s): 494.100(a)(1)</p> <p>The training must- (1) Be provided by a dialysis facility that is approved to provide home dialysis services;</p> <p>This STANDARD is not met as evidenced by: Based on a review of records, a review of the State Operations Manual Chapter 2, and staff interview, it was determined that the facility failed to meet one of two general requirements (home training) for Home Hemodialysis Training and Support Services. Approval to provide home training and support services requires the dialysis facility to provide both home training to the patient and/or their care partner in the modality and ongoing support and monitoring of the patient and/or care partner. The facility had two staff-assisted hemodialysis patients at home. Findings include: A review of medical records for two of two patients showed a lack of dialysis training provided to home hemodialysis patients and/or their care partner. A review of the State Operations Manual Chapter 2 - The Certification Process (Revised 190, 06/14/19) stated the following: End Stage Renal Disease (ESRD) Facilities - 2271 General Requirements for Home Training and Support Program: Approval to provide home training and support services requires the dialysis facility to provide both home training to the patient and/or their care partner... An approved home training and support program must include both training and support services. - 2273 Dialysis Modalities and Dialysis Related Services included the following: Home Hemodialysis Training and Support The patient and/or care partner is trained to perform routine hemodialysis treatments at the patient's place of residence by a home training nurse ... Staff-Assisted Dialysis in the Home In order to provide staff-assisted home dialysis, a dialysis facility must be approved to provide Home Training and Support Services. Staff-assisted home dialysis does not require additional approval. During an interview with the Regional Director of Operations on 2/8/23 at approximately 3:00 p.m., it was</p>

confirmed that the facility did not train home patients but only admitted patients for staff-assisted hemodialysis at home, provided by a qualified registered nurse.
